

CHRISTMAS 2023 free download

Speedee Taxis Office from "Carry On Cabby"

CARRY ON CABBY
Speedee Taxis office

The download has three sheets including these instructions.

Print the sheets at 100% full size on A4 paper.

The two sheets of parts are marked 'Thick' and 'Thin' which relates on the thickness of the card to be used. I suggest 160 gsm (about the same

thickness as a Christmas card) for the 'thin', and 1.4 mm thick mounting card for the 'thick'.

The diagram shows 'thin' pieces marked by a red dot.

Use a knife and steel rule on a cutting mat to cut the parts out, and Bostik All Purpose adhesive to glue the parts together.

Find previous Christmas downloads on the Kingsway website at www.kingswaymodels.com/freedownloads

1. Cut out the front wall of garages and canteen. Keep the fuel pump base and globes safely to one side. Cut out the *garage side inner* and glue to the rear of the garage front (the brick pattern should face inside the garage). Cut out the *garage centre wall* and glue the equivalent thin piece to the rear. Glue this behind the centre pillar between the two garage doorways.
2. Similarly, cut out the *canteen/garage wall* and glue in place; and also the *canteen side wall*. Cut out the *garage rear wall inner*, and glue to the garage side, centre, and canteen/garage walls. Ensure that the brick pattern faces into the garages.
3. Cut out the *garage side outer*, and also the *rear wall outer*. Glue these two thin pieces in place to the side and rear of the garage.
4. Cut out the garage and canteen roofs. Colour the edges with black felt pen. Glue these in place on top of the walls.
5. Cut out and assemble the two fuel pumps by folding and glueing the thin card. The thick card globes are glued back to back. Use a short length of black wire to represent the hoses. The edge of the pump base should be coloured with black felt pen.

RAMP MAY BE
ASSEMBLED UP
OR DOWN

6. Cut out the car ramp platform. Colour the edges. Score and fold down the end ramps. Cut out a black 'U' shape, and glue two black rectangles to the rear of the uprights. Colour the edges black. Repeat with the other 'U' shape. The car ramp may be assembled 'up' or 'down'. Cut out the (thin) car lift control box, and assemble.
7. If desired, add the NO PARKING sign above the canteen window. You may wish to cover over the

Speedee Taxis sign - and substitute a halulage company name, or small garage business name instead.

8. You may wish to print additional areas of concrete forecourt to use as a floor for the garages. The doors (left) did not appear in the film, but make a nice finishing touch. They may be used 'closed' or folded 'open'.

Below are some 'Glamcab' signs for any Cortinas that you can find! In the film, most cars appear to be 2 door, not good for a taxi. Oxford Diecast Cortinas are two door, whilst Base Toys ones are four door.

Glue a pair of signs back to back and use the pink strip around the edge. Be warned - it is very fiddly work!

Please do not distribute copies of this pdf, but direct friends to the www.kingswaymodels.com website.
