

# WE1

WALFORD EAST    WOLFORD EAST STATION    WALFORD EAST

glue pillars to card only when told!

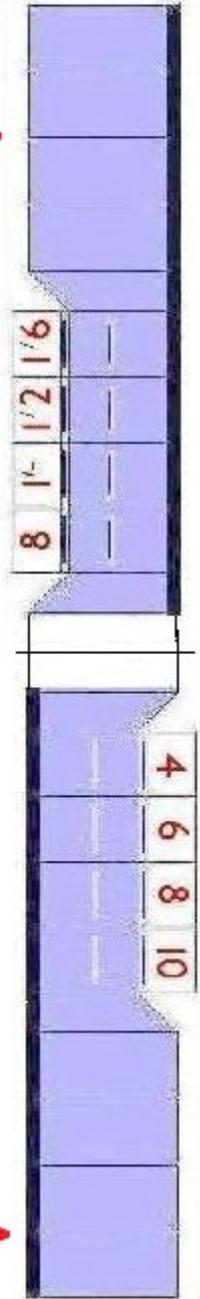

WE2

↓ glue ticket machines to thin 'Christmas' card ↓

# Merry Christmas from

A 1/76 scale card kit based on the Walford East Underground Station from BBC's Eastenders. The building is designed to fit between other buildings (shops?) in a street scene.

Make sure you print the sheets at 100% full size!

You will need to glue *most* of the parts onto stiff card – artist's mounting board would be best, but cornflake box will probably do.

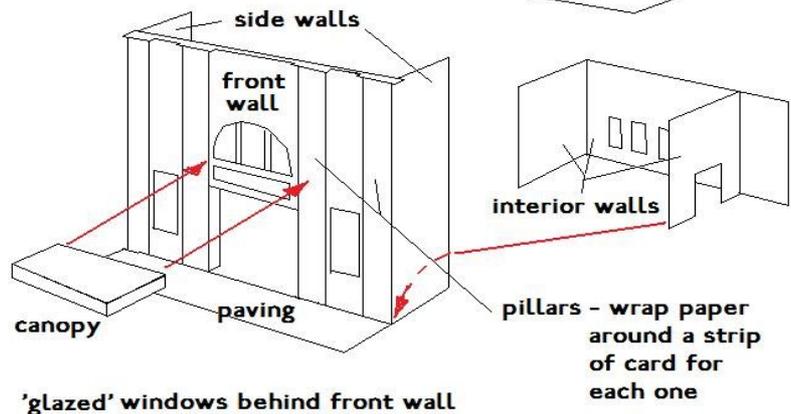

Use Bostick All Purpose glue (UHU is an alternative)

1. Cut out the front wall from sheet WE1, carefully removing the window openings.
  2. 'Glaze' the printed windows with clear tape and glue these behind the openings.
  3. Cut out some strips of plain card 13mm wide and glue these to the back of the four pillars on sheet WE1. Then fold the edges round and glue behind – this way the edges are covered as well.
  4. Glue the four pillars in place on the front wall. Note the two end pillars will overlap the edges of the front wall. Glue the two entrance pillars in place either side of the entrance.
  5. Cut out the two side walls from WE 2. Glue these into the overlaps at either end of the front wall.
  6. Cut out the wall capping piece from WE 1 and glue along the top of the front wall.
  7. Cut out the canopy frieze. Fold at the black lines and glue under the grey canopy roof. Glue the canopy at the base of the arched windows.
  8. Cut out the interior walls from sheet WE 2. Assemble these as shown in the diagram and glue inside the two side walls
  9. Cut a piece of plain card to form a roof above the interior walls.
  10. Cut out the paving carefully shaping to fit round the four pillars and glue to the base of the front wall.
  11. Carefully cut out and assemble the ticket machines – these work best on thin card, or even stiff paper.
  12. Add posters to the noticeboards and interior walls.
- The model is complete.

## WALFORD EAST

general arrangement

roof cut from card on top of interior walls

See the Kingsway High Street range at <http://www.kingswaymodels.com/page6.htm> for shops and other buildings to place either side.
